

MUSICAL WATER GLASSES

An oldie but a goodie. Varying the water levels in glasses produce different notes, for homemade musical fun!

Materials:

- Glasses or jars
- Water
- Metal skewers
- Chopsticks

Pour random amounts of water into each glass.

Tap each glass using a metal or wooden 'drumstick'. Listen to the different sounds each glass makes. You can order them from High to Low pitch or play your own tune.

Tip: You could also add a few drops of different food colouring to the water to brighten your tunes.
